As a long haul Truck Driver, I find XM Radio an indispensable tool. It helps to keep me entertained, informed, and most important alert while driving all the long hours I put in behind the wheel. For a long haul driver this is the best way for us to get our weather, traffic and news. WE can't stay tuned to one channel and we miss a lot because we may be out of the area before they give these reports.

I have always thought this country was made great by competition in business. If other broadcasts feel threatened, maybe they should review their programming.

Please, Please, leave satalite radio alone.

Sincerely,
Debra A. Stoller
